

You may also set the background colour of the note, but as the text is always black, dark colours should be avoided. A further option allows you to have one or more audible `beeps' sound when the note is displayed. Each note will display according to the attributes set for it, independently of other notes defined for the same item.

Subsequently, when the item is selected (depending on the specified display settings), the note will appear on screen; be aware that the note does not disappear automatically - you must close it/them manually.

To edit a note, double-click the note in the list you want to edit.
