

Customer ordered shortfall report

When you choose *Report > transactions* and then select *Customer ordered short fall report*, the transaction report like the one below will be produced. This report is used only for sales to customers.

Note that for this report to make sense the preference *Allow placeholder lines on customer invoices* must be checked, and the preference *Delete placeholder lines when confirming invoices* must be unchecked.

The screenshot shows a software window titled "Transaction report" with a blue header. The window is divided into several sections for configuring the report:

- Type of report:** A list of report options is shown in a scrollable box. The option "Customer ordered shortfall report" is highlighted in blue. Other options include "Cross-tab: items in rows, quarters in columns, quantity in cells", "Cross-tab: items in rows, quarters in columns, value in cells", "Cross-tab: names in rows, quarters in columns, value in cells", "Cross-tab: names in rows, quarters in columns, quantity in cells", "Cross-tab: name [Category 1] in rows, quarters in columns, quant", "Cross-tab: name [Category 1] in rows, quarters in columns, value i", "Distribution of quantities issued", "Received vs. sent", "Totals for each item grouped by transaction category then item", "Each invoice sorted by Name > Address1 field then by name", "Each invoice sorted by Name > Address2 field then by name", "Custom transaction report1", "Custom transaction report2", "Custom trans line report1", and "Custom trans line report2".
- Date range:** Radio buttons for "Confirmed Date" (selected) and "Shipping Date". Below are input fields for "From" (2/04/2015), "To" (2/04/2015), and a "Today" button.
- Transaction type:** A list of radio buttons: "Sales to customers" (selected), "Sales to and credits from customers", "Purchases from suppliers", "Purchases from and credits to supplie", "Inventory adjustment - Add stock", "Inventory adjustment - Reduce stock", and "Inventory adjustment - Net movement".
- Transaction category filter:** A dropdown menu set to "Description" and a comparison operator dropdown set to "equals".
- Name filter:** A dropdown menu set to "Name" and a comparison operator dropdown set to "contains". Below are three rows of filters: "and" dropdown, "Category 1" dropdown, "is" dropdown; "and" dropdown, "Category 2" dropdown, "is" dropdown; and "and" dropdown, "Customer group" dropdown.
- Which mode?:** A partially visible dropdown menu at the bottom left.

From the report window, select the desired parameters and click *OK*. An example report is shown below.

Customer ordered short fall report National Medical Store

Date range :01/01/2007 to 17/01/2007, Item name contains @ma@item category includes PHARMACEUTICALS

Transaction Type equals customer, Name code contains @@@, Mode: Both

Setting up mSupply to use the Customer Ordered Shortfall report

For this report to be used, you need to do the following

- Choose *File > Preferences > Invoices2* and ensure “Delete placeholder lines when confirming invoices” is **not** checked.
- Staff must enter requested amounts on invoices as placeholder lines.
 - For example, a customer orders 1000 x Paracetamol syrup 60ml. You have 800 in stock, so you add 800 to the invoice, and you also add a placeholder line for 200 bottles.
- You need to decide whether to (and if yes, how) to use the backorder system. If customers can rely on you to record shortfalls as backorders, then they will no need to re-order the shortfall in subsequent ordering cycles, as they know you will deliver it when available.
